The Daffodils

I wander'd lonely as a cloud
That floats on high o'er vales and hills
When all at once I saw a crowd,
A host of golden Daffodils,
Beside the lake, beneath the trees,
Fluttering and dancing in the breeze.

Continuous as the stars that shine
And twinkle on the milky way,
They stretch'd in never ending line
Along the margin of a bay;
Ten thousand saw I at a glance
Tossing their heads in sprightly dance.

The waves beside them danced, but they
Out-did the sparkling waves in glee; —
A Poet could not but be gay
In such a jocund company.
I gazed — and gazed — but little thought
What wealth to me the show had brought;

For oft, when on my couch I lie
In vacant or in pensive mood,
They flash upon that inward eye
Which is the bliss of solitude;
And then my heart with pleasure fills
And dances with the Daffodils.

William Wordsworth.

MEMBERS, THE AMERICAN DAFFODIL SOCIETY—

Due to the fact that there doesn't seem to be enough hours in a day, nor days in a week, and/or because of insufficient help, I have been unable to participate in the several Conventions and other activities of our Society,—tho I have been invited to do so. Thus, I have not had the pleasure of meeting and talking with very many of you,—and likewise I'm afraid that I am practically unknown to most of you. This year, I am hoping to be at Philadelphia, in April, so maybe this situation can be remedied.

However, I have been growing Daffodils, hundreds of the better varieties,—and have been a 'captive' of their charm, and entrancing ways,—for the past 30 years and more,—in Ohio, and Virginia. I am a charter member of the ADS, and my name is on the list of judges approved by the ADS to judge the horticultural section of Daffodil Shows in which ADS awards are offered. So, I believe you will find that I am qualified to serve you well, and more than satisfactorily. Your orders will be appreciated, and will, as all orders do, receive my most careful personal attention. That this has been the case in the past, and that my customers have been more than pleased, is attested to by the many commendatory letters received, year after year.

TERMS, CONDITIONS OF SALE, SUGGESTIONS, ETC.

(Please Read Carefully)

Offered herein you will find a wide selection of outstanding Daffodils,—many of the finest recent introductions, as well as the best of the older varieties; also a select list of Dutch Iris, Hyacinths, Tulips, and other spring-flowering bulbs. All are best quality, top size bulbs, from our fields or from the leading, and most reliable growers in Oregon, Holland, and Great Britain.

A large number of Messrs. Richardson's and Wilson's originations, and some of Mr. Dunlop's are listed; I can supply many others, at their retail prices (with no discount), with bulbs of their own growing,—as also are most of the others (all of the higher priced ones), of their varieties. Incidentally, the cost for postage charges will be less, than when ordered direct from Ireland. Also, all the varieties you want from these and other growers, can be included in this one order,—and you will not have to bother with getting a permit to import them.

You will note that my prices as given in this List are somewhat higher, than those of these growers, but the discounts which I allow for early orders, in cash or extra bulbs (varieties of *your* selection) will take care of this, so that on good sized orders the prices will be practically the same. (The reason for this difference in prices is that a large percentage of my sales are made thru Garden Clubs, to whom generous discounts, or commissions, are given,—and as this same List is used in these instances, the prices must of necessity be such that I can afford to give these discounts). The very worthwhile discounts which you may have, on orders of various sizes are given on the order-sheet, which is enclosed,—unless you have gotten this List thru your local Garden Club, which is planning to get up a Club order, in which case the Club receives the discount.

I presume that Daffodils are your first love, as they are mine, but there comes a time when they are with us no more, and I know of nothing better to assuage our grief at their passing, than a yard full of Tulips, in all colors of the rainbow,—or your choice of these colors.

May I call your attention to the very comprehensive list of superior varieties of these colorful flowers to be found herein,—many of which are not available at most stores where bulbs are sold in the Fall. You will find a select group of the wonderful new Ideal Darwins and others, originated and introduced by J. J. Grulleman & Sons, of Lisse, Holland, many outstanding Hybrids and other fine recent introductions, including a large number of those to be seen growing at the Keukenhof Exhibition in Holland,—65 acres of spring-flowering bulbs, in the open, and in green houses, and described by one writer as "the most glorious

display of flowering bulbs anywhere in the world",—as well as the best of the older varieties. The prices on these, like the Daffodils, may be a little higher than from some sources, but after the discount is taken, they will compare very favorably with the others.

And, why not include some bulbs in your order for growing in pots indoors; in this way you can bring a touch of Springtime into your homes long before winter is over,—by the end of January with some varieties, if they are potted up early. Tulips, Hyacinths and Daffodils (most varieties) are all splendid for this purpose. The pots, or bulb pans, and detailed information can be secured from your local florist. Also, informative articles on this phase of bulb culture will be found in many garden magazines and publications,—including the recent Am. Daff. Society Year Book.

PLEASE place your order early,—(this Spring). Stocks of many varieties offered are limited, so, to avoid disappointment, we advise placing your order before May 15th,—preferably during the blooming season. This applies especially to the Irish growers' introductions, and other new and rare varieties; also, to the Tulips,—listing so many varieties it is impossible for me to have good-sized stocks of all of them on hand at shipping time. Therefore, it is necessary that I have your order now, so that I may order the desired varieties especially for you. The discounts mentioned previously are allowed on these early orders,—in fact the orders must be in by May 15th. to receive full benefits of these discounts.

Prices quoted are for highest quality, top-size bulbs (Daffodils double-nosed), and will be found to compare very favorably with those of the same quality bulbs offered elsewhere,—especially when the discounts allowed in cash and extra bulbs, are taken into consideration.

The Daffodils are priced per bulb with 12 for the price of 10, and 6 or 3 at the same rate (6 for the price of 5, and 3 for 2½ times the each price); 100 bulbs for 70 times the single bulb price. The Tulips, Hyacinths, etc. are priced per doz. (no less than 6 of a variety sold), with 100 for 7 times the dozen price. No further cash discount is allowed, to Garden Clubs, or others, on that part of the order where the 100 rate is used.

Delivery will be made at planting time,—as soon as possible after Sept. 15th. It may be mid-October or later before all our Southern orders are sent out, but there will still be plenty of time for the bulbs (if planted soon after arrival) to make good root growth before winter.

Please add a sufficient amount for postage, to the total of your order—unless you wish it sent by Express, collect; (P. Post usually costs less, except for shipments of 40 to 50 lb. or more, going long distances). While the size, and therefore the weight of the bulbs of the different varieties will vary, the following table will be found fairly accurate. If too much is sent, the excess will either be refunded, or extra bulbs sent for same.

QUANTITY	Zones 1 & 2 (to 150 mi.)	Zones 3 & 4 (to 600 mi.)	Zones 5 & 6 (to 1400 mi.)
½ Dozen (or less)25	.28	.35
Each Additional Half-Dozen06	.10	.15

If beyond the 6th zone, please inquire at your Post Office as to the correct amount, allowing 3 lb. to the dozen bulbs,—for Daffodils and Hyacinths; (Tulips 1 lb.; others ½ lb.)

Most Garden Club orders will be sent by Railway Express, or Motor Freight, and these charges are paid on receipt of the bulbs.

Payment should be made in full with your order (excepting Garden Clubs), if you wish to receive the discount. Otherwise, 25% with the order, and the balance September 1st,—or C. O. D., if you prefer.

It will help me in booking and checking your order, if you will, when making it out, please list the varieties alphabetically, and the different bulbs,—Daffodils, Hyacinths, etc.,—in the same order as in my List.

GUARANTEE: We send out only sound, healthy bulbs, which, given reasonable care and required conditions,—which are not critical,—should produce the finest of flowers. Our fields and harvested bulbs, and those of the growers from whom we purchase bulbs, are regularly inspected by the proper authorities.

We exercise every care in keeping our stocks true to name, and purchase bulbs only from other growers who do the same. However, mistakes can be made in the rush of the digging or shipping seasons, and in this event, any bulb proving untrue to name will be replaced. But, please remember that some varieties especially the red, and pink cups, vary from year to year with the season, and please do not think that a different, or inferior variety has been sent, because a hot dry blooming season has made these varieties come without the coloring, or the substance which they normally should have. Also, some varieties classed as 1c and 2c (all white) have pale lemon crowns on first opening, which pass to white, or nearly so, with age.

Often, on orders received at, or near planting time,—in spite of the fact that we urge everyone to place their orders in the spring,—there are varieties included which we cannot at that time supply. If it is impossible for you to send your order prior to July 1st, we would appreciate your permission, with your order, to substitute similar, and as good or better varieties, for those we are unable to furnish. These are often higher priced varieties, and they are always correctly labeled,—we never substitute one variety for another, under the name of the variety ordered.

If you are not in the market for bulbs this year, it will be appreciated if you will hand this list,—with your recommendation, if merited,—to a friend who might be interested.

MINIMUM order accepted,—\$3.50, please.

THE AMERICAN DAFFODIL SOCIETY

If you are a Daffodil “fan”, and want to keep up with what is going on in the Daffodil world, you should “join up”. Dues are \$3.00 a year, and should be sent to Mrs. Wm. A. Bridges, 10 Othoridge Rd., Lutherville, Maryland.

The Annual Convention of the A.D.S., and the third National Daffodil Show, will be held at the Sylvania Hotel, in Philadelphia, April 23rd. to the 26th.

GARDEN CLUB OF VIRGINIA 25th. Annual Show will be held in Charlottesville, at the Farmington Country Club, April 8th, and 9th.

A DAFFODIL BOOK

We have on hand a few copies of “The Daffodil”, by J. M. Jefferson-Brown, and published in London. This is an authoritative and comprehensive account of the Daffodil, right up to the present time (a year or two ago); it is quite profusely illustrated, in color, and in black and white, and will be found of value to anyone especially interested in Daffodils. The price is \$3.50, postpaid.

We also have the Royal Horticultural Society classified list of Daffodil names, —a list of Daffodil varieties registered with this society during the past 50 years or so,—something over 7,000 names, and giving the classification of each variety. A valuable reference book,—almost a “must” for those who are sponsoring Daffodil Shows. The price, for the latest edition, is \$1.00, postpaid.

BLUE RIBBON WINNERS

If you would like to win a lot of blue ribbons at your Daffodil Show next Spring, varieties chosen from the following recommended ones, in the Classes in which you are interested, should do that for you. Most of them have received R.H.S. Awards of Merit (A.M.), and/or First Class Certificates (F. C. C.), and have been consistent winners in shows here, and in England. By purchasing first quality bulbs of these varieties, planting them in good well-drained soil, and providing some protection from wind and storm,—(by planting on the leeward side of a garden fence, or hedge, or the use of burlap wind-breaks); mulching with

peat-moss, etc., to prevent their being splashed by heavy rains, etc.,) they should bring your share of the Ribbons home for you. If this protection cannot be provided, the flowers should be cut as soon as they are fully developed,—or even before, with long-stemmed varieties,—and kept in a cool dark place until time for the show.

Prices will be found in the alphabetical listing, on the following pages.

CULTURAL NOTES

Daffodils are among the easiest of flowers to grow. Given only a little care, and a few required conditions, they will reward the grower with an ever increasing wealth of beauty, year after year. They prefer a sandy loam, but will do well in any good, WELL DRAINED garden soil. Planting should be done in time for the bulbs to make good root growth before winter,—early September to mid-October, depending on the latitude of your garden. We have planted bulbs in mid-December, here in Virginia, and had them do well, but this is not recommended. Large bulbs should be set from 5 to 7 in. deep,—to the base of the bulb,—or even deeper, for naturalized plantings. The distance between the bulbs may be anywhere from 6 inches up.

If the soil is rich, no fertilizer is necessary; if just average, bone-meal and/or pulverized cow manure, compost and the like are good. These should be thoroly mixed thorough the soil at, or before planting time. A light top-dressing of these, supplemented by wood ashes, ground rock phosphate, etc., applied during late Fall or Winter before the 2nd,—and subsequent,—blooming seasons, will be found beneficial. A mulch of peat-moss, spoiled hay, or other good mulching material, applied during the Winter,—several months after planting,—will be helpful in many ways, not the least of which is preventing heavy rains from splashing, and spoiling the flowers.

Daffodils should not be planted in lawns, or any place where the foliage will be cut off before it ripens, as this foliage is needed to mature the bulbs. One of the nice things about Daffodils is that they need not be dug and replanted every year,—every 3 or 4 years is sufficient, or when they have increased to the point that they are too thick to bloom well. Naturalized plantings, if planted deeply so that they increase slowly may be left undisturbed for 10 to 15 years, or more, producing good crops of flowers each year.

Digging may be done when the leaves have turned mostly yellow, six weeks or so after the end of the blooming season; it is not necessary to wait until the tops have died down entirely, in fact it is better not to do so, as it is then harder to find the bulbs,—and in a rainy season, some may already have started new root growth, for the following year. The bulbs should not be left out in the sun, but placed immediately in a cool airy building, in flat boxes, or mesh bags. (If you have no good storage place, and only a few bulbs, they may be separated, and replanted at once,—or in a few days.) The tops may be left on to dry up, or broken off, as you prefer. After curing a month or six weeks, the roots and outer skins will be dry enough to be removed; this may be done by hand, or shaking gently in a mesh or burlap bag. Bulbs which pull apart easily should be separated,—otherwise not. Replanting,—as described at the beginning of these 'Cultural Notes',—may be done in September, or even late August in the North, and September or October, in the South.

GIFT ORDERS

If you would like to give some bulbs to a friend, as a Gift, just send us the amount you wish to spend, (minimum \$3.50), and we will send Gift Certificate, and Price-List to the person to be remembered,—so they can select the varieties desired, (unless you wish to do this yourself).

CHOICE DAFFODILS

In the following list, the number and letter preceding the variety name denotes the Class (or Division) to which it belongs;—see the R.H.S. Classification of Daffodils, on page 22.

Varieties marked with an asterisk (*) are especially recommended for cutting, and landscape use. They are strong growing, free-flowering, and priced so that they may be used in quantity; (100 may be had for 70 times the single bulb price).

The names of the originators of some of the more recent introductions are given in parentheses, following the variety name. (Back.) is Mrs. R. O. Backhouse; (Brodie) Brodie, of Brodie Castle; (Mitsch) Grant Mitsch of Canby, Oregon; (Rich.) J. Lionel Richardson of Waterford, Ireland; (Will.) P. D. Williams of Cornwall, Eng.; (G. L. Wil.) Guy L. Wilson, of Broughshane, North Ireland; (O.B.F.) Oregon Bulb Farms,—Jan de Graaff,—of Gresham, Oregon.

The letters following the names give the approximate relative blooming season of that variety : E, early; EM, early mid-season; M, mid-season; LM, late mid-season; L late.

*You will note that the prices given on this, and other recent introductions, are higher than those set by the originator; but, the discounts allowed on early orders, —as given on the order sheet which is enclosed (unless your order is to be part of a Garden Club order), will do away with this difference, so that if your order is large enough to merit a 20% discount (in bulbs), the cost to you for these higher priced varieties will be the same as the originators price.

And please remember, orders for these varieties MUST be in by May 15th., preferably earlier, as stocks are very limited.

HELP: S. O. S.

(It may not be quite that bad, but I cannot "carry on" alone indefinitely. Will those (this includes the ladies) who have thought that they might sometimes like to get into the 'Daffodil game' commercially, please read these paragraphs.)

The writer,—or the compiler,—of the material in this List, the secretary who sends these Lists out, maintains the mailing list, tends to the correspondence, keeps all the records, etc., etc., the manager, the grower, the packer, the shipping clerk, and the general handy-man of the concern, all one and the same person,—yours truly,—has about come to the conclusion that this is too much of a good thing, and that it is high time for a change. In addition, he has been working at a disadvantage for a number of years, in that he has had to rent ground for the bulbs, often at some distance from home, and it is ever becoming increasingly difficult to find enough suitable land.

In view of the above, this writer has considered selling the mail-order business, and concentrating on local trade, which he may have to do, eventually,—unless perchance there might be someone among those who read this, who would like to get into a nice little established business; someone who has a nice farm for growing the bulbs (or the "where-with-all" to acquire same), with at least 15-20 acres of suitable soil (river-bottom or sandy loam); and someone who loves flowers passionately,—Daffodils especially,—is preferably in his, or her forties or early fifties, (the writer is in, or just past his mid-fifties), and is practical and capable, willing and able to take an active part in doing bigger and better things. If this intrigues you, the writer would be glad to hear from you, at an early date.

G. D. W.

P.S. The writer finds the climate and growing conditions in the section where he is now located very well suited to Daffodil culture, so if a change should be made, he would prefer not going far from there.

P.S. 2 If the interested person should by any chance happen to be of the "fairer sex", un-married or a widow, attractive, and the possessor of a number of the (so-called) old-fashioned virtues; interested,—besides flowers,—in music, travel, and the finer things of life, this writer, who has to-date managed to remain in "a state of single-blessedness", might not be averse to a change in this status,—if the other party were also so inclined.

HYACINTHS

TULIPS

A select List of highly recommended varieties, in a wide range of colors, in various types. Top-size, best quality bulbs, from Holland's leading growers. Priced per dozen, with 100 for 7 times that price. Tulips, Hyacinths, etc. should be planted for mass effect, in quantity,—preferably several dozen or more of a variety. The number after the name is the height of that variety, in inches.

Listed first are the recent introductions of J. J. Grullemans & Sons, of Lisse, Holland. The Ideal Darwins are a new and larger flowering Strain, combining marvelous color variation, perfect Show form and remarkable lasting qualities. The same can be said of the other types, of their origination,—listed after the Darwins.

SCILLA

Scillas,—or Squills,—are excellent in Rock Gardens, among Shrubbery, etc. The bulbs, which look like small hyacinth bulbs, increase rapidly, are hardy and will last for years. The Sibiricas are early blooming, and quite small,—Spring Beauty is larger, but still only around 6 inches,—while the Campanulatas,—or Wood Hyacinths,—(listed for the first time this year) are taller, up to 18 inches, and later blooming,—with the late Tulips. Their slender spikes somewhat resemble Hyacinths; they come in different shades of blue and pink, and white. They prefer partial shade, and so are right at home under shrubbery and trees, even Pines and Hemlocks.

CAMPANULATA, BLEU CELESTE — light blue	.60
" , EXCELSIOR — deep blue	.55
" , PEACH BLOSSOM — soft rose	.60
" , QUEEN OF THE PINKS — violet-rose	.45

SIBIRICA ALBA : pure white	.50
SIBIRICA SPRING BEAUTY : Delft blue, much larger than above 'Sibirica'	.70

ROYAL HORTICULTURAL SOCIETY OF LONDON

CLASSIFICATION OF DAFFODILS

DIVISION 1. Trumpet varieties : one flower to the stem, with trumpets as long as, or longer than the perianth segments (petals).

Examples — King Alfred, Trousseau, Mt. Hood.

- (A) Perianth colored (varying shades of yellow); trumpet colored also, but paler than the perianth.
- (B) Perianth white; trumpet colored (some shade of yellow, usually).
- (C) Perianth and Trumpet white — or nearly so.
- (D) Any other color combination (such as the trumpet being lighter in color than the perianth).

DIVISION 2. Large-Cupped varieties : One flower to the stem; crown more than one-third, to nearly the length of the petals.

Examples: Fortune, Bodilly, Kilworth.

(A), (B), (C) and (D), as in Division 1,—except in (A), the colored crowns may be yellow, orange, red, etc., and in (B), wholly, or in part, yellow, orange, red, pink, buff, apricot, etc., etc.

DIVISION 3. Small-cupped varieties : one flower to the stem; cups less than one-third the length of the petals. (A), (B), and (C), as in Divisions 1 and 2.

Examples — Mangosteen, Lady Kesteven.

DIVISION 4. Double varieties.

DIVISION 5. Triandrus varieties : Usually 3 (sometimes more, or less) white, creamy white, or pale yellow flowers per stem.

Examples — Thalia, Stoke, Silver Chimes.

- (A) Cup not less than one-third the length of the petals.
- (B) Cup is less than one-third the length of the petals.

DIVISION 6. Cyclamineus varieties; usually rather small flowers, with reflexed petals.

Examples — February Gold, Beryl. (A), and (B) as in Division 5.

DIVISION 7. Jonquilla varieties : True Jonquils, and their hybrids, — 3-6 golden yellow, fragrant florets per stem, (1-3 for the hybrids, — and they may, or may not, be fragrant.)

Examples — Jonquilla Simplex, Trevithian, Golden Goblet. (A), and (B), as in Divisions 5 and 6.

DIVISION 8. Tazetta varieties : Mostly Poetaz Hybrids, with 3 to 6 or more, more or less fragrant florets per stem.

Example — Geranium.

DIVISION 9. Poeticus varieties : The Poet's Narcissi,—snow-white petals, and red-rimmed cups.

Example — Actaea.

DIVISION 10. Species and wild forms.

DIVISION 11. Miscellaneous,—those not falling in any other group.

D A F F O D I L S for NATURALIZING — and Cutting, in Quantity

FINE MIXTURE — made up of dozens of good varieties, in all (or most)
types; large bulbs, mostly double-nosed per 100 — \$7.00

NAMED VARIETIES — your selection of types (Trumpet, Large-cupped,
Short-cupped, etc.), and colors (yellow, yellow and orange, white
with colored cups, all white, — very few of these latter), but my
selection of varieties per Bushel — \$17.50

These bulbs offered by the bushel are smaller than those listed in
the main part of this Price-list, — and therefore a lot more in a
bushel, at least 300, up to 500 or so bulbs, most of them blooming
size.
